Passage

- Everyone thinks that diabetes is a disease where the patient excretes a lot of sugar, is very thin and is inordinately thirsty.
- But there are many people who probably have diabetes and won't know they have it until a severe symptom arises.
- However, there are some minor warning symptoms to look out for. Diabetes tends to be hereditary.
- If you have a diabetic parent, brother, sister or even aunt, there is an increased risk of the disease.
- If a woman unexpectedly has one or two failed pregnancies, it will need to be investigated in several ways, but the possibility of her being a diabetic must be reckoned with.

Passage

- Similarly, a mother who produces a really large child; for example over four and a half kilos, needs to consider this possibility.
- One of the early signs of diabetes is when the patient feels disturbed by boils or skin swellings for no apparent reason.
- Another skin condition associated with diabetes is when there is disturbing itching, generally at night, after a visit to the rest room.
- Lastly, if it turns out that you do have diabetes, don't jump to the conclusion that injections will be essential.
- It may well be possible to treat you either by diet alone or by insulin taken by mouth.
- So, if you have any suspicions at all that you may have diabetes, don't be afraid to consult your doctor.

Passage

- **156 — Which of the following is NOT mentioned as a mild symptom of diabetes?**
 - 1) Excessive sugar excretion
 - 2) Several miscarriages

- **157 _ Patients are advised to _____ when they are suspicious of having diabetes.**
 - 1) consult a physician
 - 2) inject insulin
 - 3) avoid frequent pregnancies
 - 4) ignore family history

Passage

- **158** _ it is stated in the passage that many diabetics are unaware of their disease until
 - 1) they become extremely thirsty
 - 2) their relatives inform them
 - 3) some serious signs emerge
 - 4) they observe trivial symptoms
- **159** Skin problems are considered to be among the warning symptoms of
 - 1) diabetes
 - 2) failed pregnancy
 - 3) heredity diseases
 - 4) itching

Passage

- **160 — The public belief associates diabetes with**
 - 1) sugar accumulation
 - 2) excessive thirst
 - 3) obesity problems
 - 4) apparent itching
